

Linux Task 01_Anju Sahana: Linux Environment Setup & Essential Commands

Objective

The purpose of this task is to become familiar with the Linux operating system, terminal usage, navigation, and basic file management commands. Linux is one of the most important skills for Cyber Security professionals, System Administrators, and Ethical Hackers.

Part A: Linux Installation & Verification

UBUNTU

Part B: Basic Navigation Commands

- **pwd (Print Working Directory)**
Shows the current directory path you are in
- **ls**
Lists all files and folders in the current directory.
- **ls -la**
Lists all files and folders (including hidden ones) in detailed format.
- **cd**
Changes the current directory (move between folders).
- **clear**
Clears the terminal screen.
- **history**
Shows the list of previously executed commands.
- **whoami**
Displays the current logged-in username.
- **hostname**
Shows the name of your computer/system.

```
anju_sahana@LAPTOP-P6ICEUJP:~$ pwd
/home/anju_sahana
anju_sahana@LAPTOP-P6ICEUJP:~$ ls
anju_sahana@LAPTOP-P6ICEUJP:~$ ls -la
total 48
